

Classification of Japanese maple cultivars

Cor van Gelderen

May 2018

Key to the groups

1:

- A- middle lobe reduced and usually shorter than the lobes surrounding. **Witches Broom Group**
- B- leaf sessile and lobes reduced at the base to the central nerve. **Sessilifolium Group**
- C- lobes convex and usually seven or more lobes. **Convexum Group**
- D- leaf margin wavy or curly, no more than 5 lobes. **Crispum Group**
- E- branches with a pine like rough structure. **Pinebark Group**
- F- leaf divided to the base. Go to 2
- G- leaf divided to half the leaf blade or less. Go to 4
- H- leaf divided to two third. Go to 5

2:

- A- lobes strongly double toothed. **Dissectum Group**
- B- lobes only lightly toothed or almost entire. **Linearilobum Group**
- C- lobes wider and clearly toothed. Go to 3

3:

- A- foliage colour in summer green. **Matsumurae Group**
- B- foliage colour in summer red or reddish green. **Atropurpureum Group**
- C- foliage colour in summer variegated. Go to 7

4:

- A- foliage colour in summer green. **Amoenum Group**
- B- foliage colour in summer red or reddish green. **Atropurpureum Group**
- C- foliage colour in summer variegated. **Variegatum Group**

5:

- A- foliage colour in summer red or reddish green. **Atropurpureum Group**
- B- foliage colour in spring and early summer orange to yellowgreen. **Aureum Group**
- C- foliage colour in spring and early summer pink or pinkish-red. **Corallinum Group**
- D- foliage colour in summer green. Go to 6
- E- foliage colour in summer variegated. Go to 7

6:

- A- winter branches red, orange or yellow. **Red Wood Group**
- B- branches green or brown. **Palmatum Group**

7:

- A- leaf margin in a contrasting colour. **Marginatum Group**
- B- veins in a contrasting colour. **Reticulatum Group**
- C- variegated leaves but not just the margins. **Variegatum Group**

This key includes all maple cultivars from the *Acer palmatum* complex, including *Acer matsumurae* and *Acer amoenum*. It also includes hybrids of *Acer palmatum* with *Acer shirasawanum* and *Acer circinatum*, but it does not include these two species themselves as well as all other species form the section *Palmata* within the genus *Acer*.
